About Me

Computer Science student with four years of academic experience in programming and software development. Seeking opportunities to apply technical knowledge and expand professional skills while pursuing a long-term career path toward becoming a Senior Developer. Quick to learn new technologies, adaptable, and committed to continuous improvement.

Skills

Programming Languages : Backend & Database :

- JavaScript
- TypeScript
- Python
- Go
- C++
- C#
- Node.js
- MySQL
- Supabase
- MongoDB

Web & Mobile :

- HTML / CSS
- Next.js
- Flutter
- Tailwind
- React
- Angular
- Spring Boot
- Dart

Languages :

- Thai (Native)
- English (Moderate)

Education

Boonwattana School

Arts-Mathematics Program

GPA : 3.61

2019-2022

Rajamangala University of Technology Isan

Bachelor of Science in Computer Science

GPA : 3.44

2023 – Present

Experience & Project

Albion Market AI (albion-market-ai.online)(Game Economy Tracking & Analytics Platform)

2025 - 2026

- Developed a comprehensive end-to-end web platform designed to track, aggregate, and analyze complex marketplace data within the Albion Online ecosystem.
- Implemented an AI-driven chatbot interface capable of evaluating market trends and providing users with accurate in-game item pricing estimations.
- Managed backend system architecture and cloud infrastructure, successfully deploying robust server logic on Render and configuring the live custom domain.

Meow Chat

2026

- Developed a real-time chat application that enables users to communicate instantly through a modern and responsive web interface.
- Implemented secure user authentication, real-time messaging, and chat room management to provide a seamless communication experience.
- Built both frontend and backend components while integrating database operations and RESTful APIs for efficient data management.
- Collaborated with team members using Git and GitHub, participating in feature development, bug fixing, and code reviews.

Smart Kitchen Lens (ChefKub)(AI-Powered Recipe) Recommendation Application

2025 – Present

- Engineered a full-stack application utilizing Next.js and Flutter, featuring a "Snap & Process" architecture to analyze user-uploaded photos of food ingredients.
- Integrated YOLO object detection models for precise ingredient recognition, seamlessly piping the extracted data into the Gemini API to dynamically generate personalized recipe suggestions.
- Architected the end-to-end system and database schema to efficiently manage image processing workflows and ensure high-performance API interactions.
